

How To: Exit Excel 2010 with “Defer Layout Update” enabled

How-To #:	10121315
Last Revised:	2010-12-13
Product(s):	MDX Provider for Oracle OLAP (all versions)
Database Version(s)	N/A
Client Application(s):	Microsoft Excel 2010
Platform(s):	All supported Excel 2010 platforms

Overview

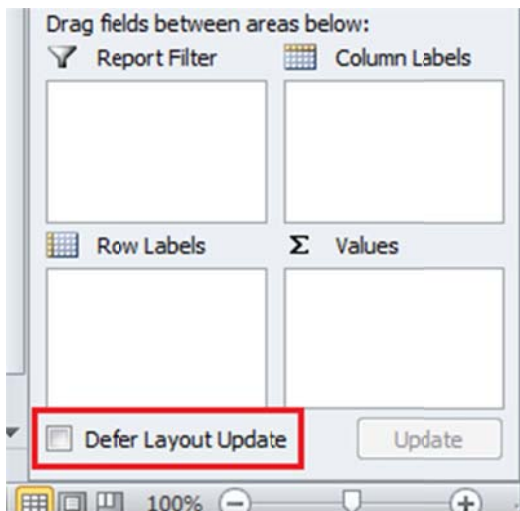

Exiting Excel 2010 with the “Defer Layout Update” box checked may cause Excel 2010 to either lock-up or crash when the OLAP PivotTable Extension is installed.

How to Reproduce the Error

With the OLAP PivotTable Extensions installed and a pivot table, check the “Defer Layout Update” box and attempt to quit Excel 2010. Excel 2010 will either lock-up or crash.

How to Resolve the Error

Uncheck the “Defer Layout Update” box prior to exiting Excel 2010.

Further Details

This happens on all pivot tables under Excel 2010, regardless of provider. When an add-in registers itself to receive Excel application events and the “Defer Layout Update” box is checked, Excel 2010 will lock-up or crash upon exit.
